

# QuDi Portable Drive

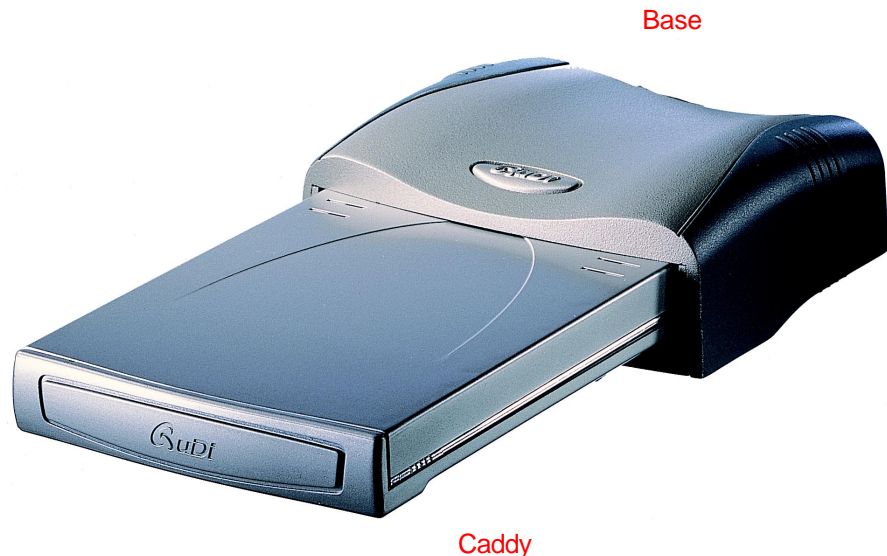

## Key Features:

- Lightweight Portable Drive for mobility and security.
- Removable caddy fits in your pocket.
- Flexible Design — Separate Base and Caddy.
- Expandable — caddy is available in 10GB, 20GB, 32GB, and 48GB capacities.
- Interchangeable base for USB 1.1 or FireWire (1394).
- Supports both Mac and PC platforms.
- Plug and play and Hot Swappable.
- Share large files between Macs and PCs.
- Great for archiving, sharing and organizing data.
- Blazing fast 15MB/s transfer speed (FireWire Base).
- No need for external power supply.

The Macsense QuDi Portable Drive is one of the lightest external storage drives available, and the most flexible as well. Choose an interchangeable Base, available in USB or FireWire, and connect quickly and easily to your PC or Mac. Bases are Plug-and-Play as well as hot swappable. Next, snap in a Caddy, 10, 20, 32 or 48GB, and you have a portable and removable storage system. Leave one FireWire Base at the office and bring a USB Base on the road, share a 10GB caddy between home and office, or use several caddies to organize your data and files. The detachable Base-and-Caddy design allows you to mix and match between two interface types, while the four different caddy capacities easily meet your portable storage needs without any redundant investment.

A QuDi caddy is great for storing super-sized MP3 files, video and graphics images, and game files. And the high capacity caddies allow you to pack everything you need into one caddy; no more shuffling between multiple disks. The Caddy is lightweight at 5 ounces and fits easily in a pocket, purse or briefcase. The QuDi Caddy transfers files at 1.2MB/s (USB) and 15MB/s (FireWire), which is perfect for data archiving, file sharing or multimedia applications. With the Macsense QuDi Portable Drive, you get more capacity, more speed, and more choices – all in a small, lightweight package!

Every Macsense QuDi Portable Drive comes bundled with a collection of useful software/utilities that allow you to do backups, organize your data and transfer data easily between platforms. Windows users can organize CDs with Virtual Drive, backup their hard drives with Backer 5, and transfer data easily between a PC and a Mac with MacDrive 2000. Smart Tool lets Mac users protect and configure Caddies for maximum security. The unique design of the Macsense QuDi Portable Drive, combined with these valuable software tools, make QuDi the best and most versatile solution in portable data storage.

# QuDi Portable Drive

## Includes These Valuable Software Titles:

### MacDrive 2000

Now you can access files on Mac-formatted QuDi Caddies directly from Windows on your PC!

MacDrive 2000 is a simple and seamless way to share your documents between Windows and MacOS. It is a great way to get Mac files to Windows, as well getting Windows files to Mac. For PC only.

### Backer

Backer is a comprehensive program that allows PC users to synchronize, transfer, backup and archive their directories and files. Simply backup your hard drive content to a QuDi Caddy for archiving and safekeeping. Backer can synchronize your files so you're always up to date, and have them automatically restored in case of an accidental deletion, virus attack, or system crash. For PC only.

### Virtual Drive

Virtual Drive emulates a 200X CD-ROM drive, which enables you to create up to 23 separate CD-ROM "drives" on a single QuDi Caddy. You no longer need to swap your Encyclopedia, mapping or gaming CDs in-and-out of your CD drive just to use them. Now you can have these CDs available online all at once and ready to use. For PCs only.

### Smart Tool

With the QuDi FireWire Base, this disk utility allows Mac users to configure and protect their FireWire volume for better performance and security. For Macs only.

## Features and Benefits

### Portable

- This small, lightweight external storage solution allows you to carry your data in your pocket, so you can take your work anywhere.

### Ultra Fast

- Transfer data at 800KB/s (USB Base) or at the blazing speed of 15MB/s (FireWire).

### Expandable

- The removable Caddy offers 10GB, 20GB, 32GB, or 48GB of storage capacity. The capacity can be upgraded by simply changing to a higher capacity Caddy.

### Compatible

- Caddies are compatible with desktop or portable PCs and Macs. Cross-platform file transfers are quick and easy.

### Power Off Protection

- Protects your data by automatically shutting off the power whenever the Caddy is removed. No external power adapter is required.

### Hot Swappable

- Plug and Play means QuDi can be easily swapped or upgraded to a higher capacity. Mounts instantly without restarting your computer.

### Useful Software

- Bundled software provides valuable tools for the latest in productivity, creativity and protection.
